Distributed Systems

Assignment 1 – Client Server Chatting App

Student No.	IT 15 0190 28
Name	L.T.Marasinghe
Batch	Weekend

Setting Up

1. Open the folder with NetBeans IDE (>8.0)
2. First run the **ChatServer.java** file.
3. Then run the **ChatClient.java** file. Set the server name as *localhost.* Enter a client name as you wish.
4. You can run many clients. All clients' names will be added to the list box on the top of the chat client.
5. To send a message to all the clients, Select All from list box and type your message in the bottom text box and press enter. Message will be broadcasted.
6. You can send private messages by selecting any client or many clients.
